Head Deptt. of Home Science

Mrs Sumela Chatterjee

Deptt. of Management

Students- BBA , BA

Activity- To spread Awareness about the ill-effects of Pollution on health .

Number of students: 40

Venue : College Campus

The institution is always aware to instil the sense of responsibility in the students to perform their duties towards society. We impart moral values in the students. Conscious and continuous efforts are carried on towards the improvement and betterment of society. Human health and well being are intimately linked to the state of environment. The good quality of natural environment provides for basic needs , ie clean air and water, fertile land for cultivation etc. The environmental problems like global warming, acid rain, air pollution, waste disposal, ,ozone layer depletion , climate change and many more affect every human being, animals and nation on this planet. There have been advances in agriculture, sanitation ,water treatment and hygiene and they have a greater impact on human health . Although the environment can sustain life, it can also cause diseases . The environment represents an important pathway for exposure of humans to polluted air, noise, and

hazardous chemicals. Environmental hazards increase the risk of heart problems, cancer, asthma and many other diseases. It has been found that maintaining a healthy environment is central to increasing quality of life and years of healthy years.

The goal is to promote health through a healthy environment. Humans interact with environment constantly as a result it affects life. Improving the quality of environment in areas like air, water and noise pollution can improve human health. Air pollution is the largest health risk in the world ,which results in serious diseases. Similarly noise pollution results in change in sleep patterns and annoyance leading to hypertention and cardio vascular diseases. Exposure to chemicals is also a key concern. This raises concern for health effects due to these exposures. Keeping these in mind a Poster Presentation was organized on 11th January 2020 with the theme ' Health care and Environment' in the campus of the college for this purpose. The coordinators Mrs Sunita Asati ,Home Science Department ,and Mrs Sumela Chatterjee, Management Department, organised the event in the institution. The students actively participated with presenting posters and Rangoli to bring awareness about pollution and its ill effects. The presentation was organised in the hall, and the students participated and were involved in large numbers.
